There were 0 incidents in which staff segregated the victim and locked them down Protective Custody.

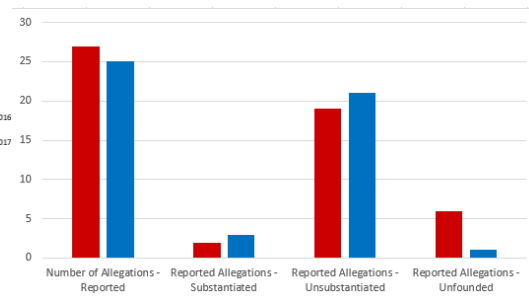

### Corrective Action

The PREA standard §115.86 requires an incident review of each alleged sexual assault/abuse unless the incident was unfounded. This review must consist of the following individuals; line supervision, upper-management, medical/mental healthcare and an investigator. No corrective action was taken during the 2017 Calendar year.

A review was completed of each of the reports. It was determined that the inmates typically victimize other inmates. There were no sustained Staff on Inmate allegations for either abuse or harassment. The attached charts show a detailed comparison of the Charlotte County Sheriff's Bureau of Detention statistics regarding Inmate on Inmate victimization for the year 2016 and 2017.

Sexual Abuse

Sexual Harassment

The number of Abuse allegations for 2017 dropped from that previously reported in 2016. There continued to be no substantiated Sexual Abuse/ Assault. The total number of alleged Harassment complaints dropped from that of the previous period, however sustained increased slightly from 2 to 3.

It can be determined upon review of the incidents that the reporting of PREA crimes remained consistent due to the continued PREA related education provided to the inmate population. The facility has further initiated the "Survivor" program, with the help of the Wayne Foundation, to assist in identifying and offering one on one assistance to inmates that are victims of sexual abuse / human trafficking both internally and externally of the jail environment.

In reviewing all of the reports, most allegations were made against other inmates primarily in the Housing unit areas. The Charlotte County Sheriff's Office conducts numerous rounds throughout the housing units each hour to increase staff visibility and reduce opportunities for PREA incidents to occur. The Charlotte County Jail has also not only increased its camera monitoring, increased installation of security mirrors, but also began an upgrade to our cameras to an enhanced digital video surveillance of all housing units to assist in limiting blind spots.

In accordance with PREA and its standards, we mandate zero tolerance and commit to maintain a secure, safe and humane environment for inmates and staff.
